

\$43.2B To bolster national security, safeguard U.S. nuclear weapons, and maintain critical infrastructure that keeps our economy moving

PRIORITIZING NATIONAL SECURITY

- **Boosts funding for the Department of Energy's nuclear weapons security programs** by **\$1.7B** above FY17 levels, totaling **\$14.7B**. This includes:
 - **\$10.6B** for Weapons Activities, **\$1.4B** above FY17, to maintain a strong nuclear deterrence posture, modernize the nuclear weapons stockpile, and address aging infrastructure
 - **\$1.6B** for Naval Nuclear Reactors, **\$200M** above FY17, including funds for the Columbia-Class Ballistic Missile Submarine and nuclear spent fuel infrastructure
 - **\$2B** for Defense Nuclear Nonproliferation, **\$116M** above FY17
- **Increases funding for defense infrastructure cleanup** by **\$583M** above FY17, including **\$235M** for new projects to demolish high-risk excess Cold War-era facilities
- Includes **\$248M** (**\$18M** above FY17) for research and development to **ensure the nation's electric grid remains secure from cyberattacks and resilient against extreme weather events**

IMPROVING WATER RESOURCES INFRASTRUCTURE NATIONWIDE

- Provides **\$6.83B**, an increase of **\$789M** above FY17, to the Army Corps of Engineers to **improve and rebuild the nation's water resources infrastructure**, enhance public safety, and advance American competitiveness and export ability
 - **Increases funding for navigation improvements that are critical to economic growth** by **\$403M** (totaling **\$3B**, including **\$1.4B** in funding from the Harbor Maintenance Trust Fund)
 - **Reduces risks of flooding nationwide** by including a total of **\$1.9B** for flood and storm damage reduction projects, **\$215M** above FY17
 - **Invests in infrastructure** by providing at least **\$224M** above the budget request for construction of Inland Waterways Trust Fund projects
- **Addresses Western water needs** by providing the Bureau of Reclamation with an additional **\$256M** for water conservation and delivery projects, including **\$134M** for water storage projects authorized under the WIIN Act and **\$67M** for rural water projects

ADVANCING AN ALL-OF-THE-ABOVE AMERICAN ENERGY SOLUTION

- **Targets Department of Energy funding to programs that encourage U.S. economic competitiveness and help advance an "all-of-the-above" solution to energy independence**
 - Total funding for the Department of Energy's energy programs is **\$12.9B**
 - Ensures robust funding (**\$727M** total, **\$59M** above FY17) for research and development to **advance coal, natural gas, oil, and other fossil energy technologies**, which will help the country make greater use of our rich natural energy resources and help keep down energy costs
 - **Promotes innovation in nuclear energy** by funding these activities at **\$1.2B**, including providing key increases for advanced reactor technologies that will pave the way for future reactor developments
